Experience

University of Texas at Arlington, Office of Information Technology

Service Desk Student Technical Assistant | Arlington, Tx | Aug 2025 to Dec 2025

- Provided Tier 1 technical support to 5,000+ students, faculty, and staff via phone, chat, email, and walk-up support, resolving 30-40 tickets daily.
- Created and managed 500+ incidents and service requests in ServiceNow with 95% documentation accuracy and proper categorization.

- Verified user identity and performed password resets, MFA troubleshooting, LockDown Browser support, and access remediation in accordance with security procedures.
- Escalated complex issues to Tier 2 teams with detailed reproduction steps, environment context, and user impact to reduce resolution time and rework.
- Communicated clearly and patiently with non-technical users during extended troubleshooting sessions, setting expectations and maintaining a positive support experience.

Tarrant County College, Financial Aid Office

Student Services Outreach and Mentor | Hurst, Tx | May 2024 to Jul 2025

- Coached new students through FAFSA completion, including users with no prior computer experience
- Tracked contact attempts, outcomes, and follow-ups with detailed documentation for consistency and reporting

Men's Wearhouse Corporate Office

Technical Support Representative | Fort Worth, TX | 2012-2015

- Provided Tier 1 technical support to approximately 250 corporate office users including account access management, software troubleshooting, hardware diagnostics, and peripheral support
- Created and deactivated user accounts in Salesforce with administrator-level access; performed identity verification and credential provisioning
- Created and managed service account requests and tasks to provision and deprovision user access; documented all access changes in ServiceNow
- Maintained asset inventory tracking including asset tags, hardware serial numbers, and device assignments; supported equipment relocation during employee promotions and office reassignments; ordered replacement equipment as needed
- Managed ticket documentation and resolution workflow with consistent escalation to Desktop Support and cross-functional IT departments to resolve complex issues
- Provided direct support to executives, directors, and vice presidents with expedited response and white-glove service standards

Projects

Home Lab Environment

- Built virtualized lab environment using VirtualBox running Windows Server 2019, Ubuntu Linux, and Windows 10/11 clients.
- Configured Active Directory domain, DNS, and DHCP services for hands-on certification study.
- Practiced troubleshooting scenarios including user provisioning, group policy, and network connectivity issues.
